How can I fix "missing SPF" problem?

Every Supplier

Challenge

What if you need to assess **1000** suppliers periodically?

Hint: Not every supplier is equally important.

With **NormShield**
You can prioritize your vendors and optimize cost

With current solutions
You have to pay full price for every vendor or not monitor most of them

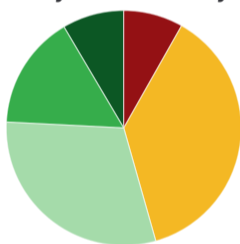

\$136,000

Cost

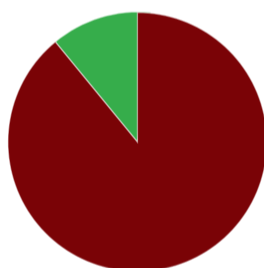

\$860,000

Visibility to Entire Ecosystem

● Once only 8.2%
● Annually 37.4%
● Quarterly 30.2%
● Monthly 15.7%
● Continuously 8.5%

Partial or Outdated Visibility

● Once only 79.1%
● Continuously 20.9%

WHY NORMSHIELD

NormShield provides full and continuous visibility to your entire supply chain and you can save TIME & MONEY.

THE SOLUTION:

NormShield enables enterprises to assess and monitor their own and their third-party vendors' external cyber risk posture by performing **non-intrusive** cyber risk assessments and converting the data into form of a **scorecard**.
